Risk Assessment RA015 – Use of Hand Tools

Use of Hand Tools Main Hazards are:								
Main Hazards are: Eye injury Noise								
Elying particles from tools Injury to hands, feet and body Tripping over tools Persons Property affected								
Flying particles from tools								
Flying particles from tools Tripping over tools Persons / Property affected All Employees General Public Assessment of Risk: Severity 2 X Likelihood 3 = Risk 6 Control Measures already in Place 1. Work should be undertaken away from pedestrian walkways. 2. Portable screens to be used as a barrier between the work area and other people. 3. All tools must be assessed to ensure that they are fit for purpose and are in good working order. 4. Visual checks must be completed by operatives on the tools prior to their use. 5. Open-bladed knives, screwdrivers and other sharp tools are to be carried and used so as not to cause injury to the user and others. 6. Tools should be either earthed or double-insulated. 7. Non-ferrous (spark free) tools are to used in flammable atmospheres. 8. A system of regular planned maintenance and inspection by a competent person should be in place and a record kept of all maintenance. 9. All workers must wear appropriate personal protective equipment (PPE) 10. All damaged tools to be scrapped and replaced immediately obtaining authorization from works manager. Assessment of Risk: Severity 2 X Likelihood 1 = Risk 2 Additional Controls required All personnel MUST wear the appropriate level of PPE for the activity they are involved with or area they are in tools/equipment they are to use.

Risk Assessment RA015 – Use of Hand Tools

RISK RATING = L x S			Hazard Severity (S)				
			1	2	3	4	5
			Negligible	Slight	Moderate	High	Very High
Ē	1	Very Unlikely	LOW	LOW	LOW	LOW	LOW
.ikelihood (L)	2	Unlikely	LOW	LOW	LOW	MEDIUM	MEDIUM
	3	Possible	LOW	LOW	MEDIUM	HIGH	HIGH
	4	Likely	LOW	MEDIUM	HIGH	HIGH	HIGH
	5	Very Likely	LOW	MEDIUM	HIGH	HIGH	HIGH

Like	Likelihood						
1. Very Unlikely		A freak combination of factors would be required for an accident/incident to occur					
2. Unlikely		A rare combination of factors would be required for an accident/incident to occur					
3.	Possible	Could happen when accidental factors are present but otherwise unlikely					
4.	Likely	Not certain to happen but an additional factor may result in an accident/incident					
5.	Very Likely Almost inevitable that an accident/incident would occur						
Haz	ard Severity						
1.	Negligible	Negligible injury, no absence from work					
2.	Slight	Minor injury requiring first aid					
3.	Moderate	Injury leading to a lost time accident					
4.	High	Involving a single person with a serious injury / death					
5.	Very High	Multiple persons with serious injury / death					
Out	Outcomes						
LOW		Score (1-6) May be acceptable. Annual Review to see if risks can be reduced further					
MEDIUM		Score (8-10) Identify controls must be identified or specific method statement required					
HIGH		Score (12-25) Task <u>must not</u> proceed. Senior Management to consider if the risks can be reduced by purchase of additional training, additional equipment, additional staff, additional signage, safe system of work, permit to work or radical changes in method.
